Tear Apart the "Theory" of Evolution And Win Every Debate, Every Time...

**Show any Skeptic that Evolution is Based on Myths,
Falsehoods and Outrageous Lies – In 5 Minutes or Less!**

Dear Friend,

I'm fed up with Darwin...

When evolution supporters tried to make me feel foolish for believing in God, I decided to do something about it.

Evolution is not proven fact. Every one of their claims can be torn to shreds. All you need are the missing pieces. Today, I'll show you what they are.

Within minutes, you'll:

- Quickly take down self-righteous atheists...
- Easily and accurately defend God's role as our Creator...
- Send hardened skeptics into a state of confusion...
- Expose the "theory" of evolution and leave scientists with their mouths hanging open...

My name is Jeffrey Howard. If you ever challenged someone on evolution, I have great news.

By the time you read to the end of this letter, you'll have everything you need to take on the skeptics and win.

You'll never be at a loss for words. The whole evolution debate will be right in your pocket.

Use it anytime, anywhere... It's much easier than you think. Once you get the real story, it takes less than 5 minutes!

How a Sunday Morning Sermon Changed My Life Forever...

A few years ago, I joined some friends for brunch after church. At the table was the husband of a friend. Let's call him, "Tom."

Tom is not a Christian and was not at church with us. But he showed up for the sake of being social. At first, I thought nothing of it. But when I saw his reaction to our conversation, I knew trouble was brewing.

The sermon that morning was from the book of Genesis. Our pastor has a wonderful way of telling the story of Creation. And like many folks do, we got together after church to share our thoughts about it over coffee.

We weren't talking 5 minutes before this man's face turned to ash. Without moving a single muscle he said, "The idea that God created the world is childish... Educated men don't believe in myth and fantasy."

We were all stunned. He was usually tolerant. But there he was... trying to make us feel ignorant for believing in God's power to create this marvelous world we live in.

For the next hour and a half, I went head-to-head with the theory of evolution. But I lost.

I just didn't know how to go up against his arguments. Don't get me wrong: My knowledge of the Bible is better than most. And my faith is unshakable.

But in that moment, I realized I couldn't defend God's place in our lives because I didn't know a thing about this "theory" of evolution.

After I got home, I felt as if I had somehow let God down. I thought for sure that if I just shared my faith and His teachings, Tom would naturally "get it." I was wrong...

That's when everything changed.

The very next day, I decided to do something about it. If I wanted to win, I needed to challenge him on his own turf. And that meant learning everything I could about evolution.

As a freelance writer and investigative journalist specializing in health and medicine, I took on evolution like I would any other project.

For months, I searched trade journals... talked to teachers, preachers and university professors... and looked at all the available evidence; especially the stuff scientists keep out of the media.

And let me tell you something...

What I Discovered about Evolution Gave Me the Shock of My Life

The theory of evolution is full of holes. And I'm not talking about minor differences of opinion. I'm talking about huge, gaping holes you could drive a truck through.

But here's the problem: We never challenge it.

Defending God's Word is a great first step. But if you don't poke holes in the theory of evolution itself, they'll NEVER get it.

And that's bad news... All you have to do is open a newspaper to know the scientists are winning.

And it's Not Just Evolution...

As Christian conservatives, we're losing the values we hold dear: Freedom of choice and self-determination. And it's happening faster than at any point in our history.

More and more, the science mafia is making decisions that cut into your ability to live as you please – and of course, big government agencies are helping them along.

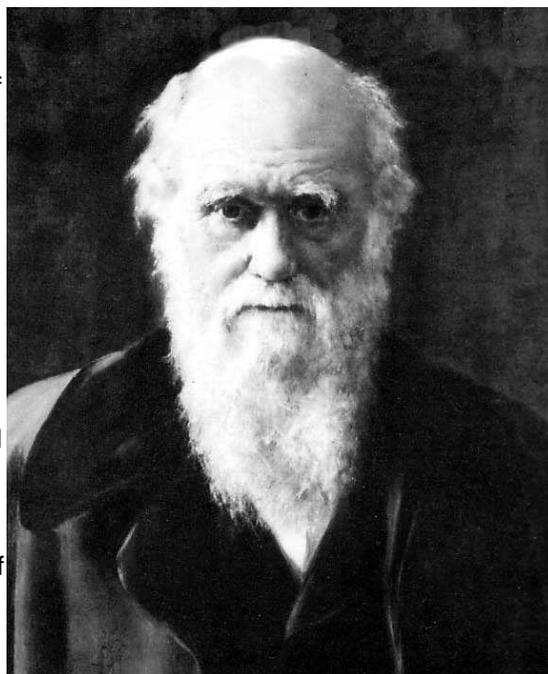

It all started in 1859, when Charles Darwin published his first book on evolution. Almost immediately, scientists, atheists and university types grabbed the idea and promoted the heck out of it.

Once they figured out evolution was their golden opportunity to get rid of God, there was no stopping them. They pushed evolution to the point of becoming "official policy" without ever letting you know it would crumble if exposed to the light of day. So that's what I did: I exposed it. And boy did it crumble...

Here are Just a Few Examples of what I Found

Darwin himself said that future scientists would find fossils of "transitional forms." Here's what he meant: If fish really evolved into animals, you would find fossils of creatures that were half-fish, half-animal. This would show that one species was making a transition into another.

So far, no transitional forms have ever been discovered! And of course, no transitional creature exists today. Let's be honest: Have you ever gone to the zoo and seen a cross between a fish and an animal? Or a half-man, half-monkey?

Charles Darwin in 1881

All the creatures living on this planet are perfectly formed. There is no record of any animal, fish, beast or creature EVER turning into a different species.

In fact, the real fossil record shows almost no change. That means many of the creatures on this Earth have not changed since the beginning of time.

Here's something else you won't read in the newspaper: Hundreds of scientists and university professors are coming out against evolution. This should be front-page news. But you'll never hear about it in the media.

Check out what some of them are saying about these missing fossils:

- Professor Steven J. Gould, Harvard University: "The extreme rarity of transitional forms in the fossil record persists as the trade secret of paleontology."

Translation: Dr. Gould is a little too kind. The number of transitional forms is ZERO.

- Dr. Colin Patterson, British Museum of Natural History: "I will lay it on the line – there is not one such fossil for which one could make a watertight argument."

Translation: There's simply no hard evidence for evolution.

- Dr. Gareth J. Nelson, American Museum of Natural History: "It is a mistake to believe that even one fossil species... can be demonstrated to have been ancestral to another."

Translation: Darwin's theory doesn't have a leg to stand on...

Fossil: This is a shrimp fossil found in Lebanon. These pictures tell scientists what fish and animals looked like long ago.

You Think That's Something? Check This Out...

At some point in our history, thousands of new creatures suddenly appeared. And the scientists actually agree on this. This one fact is enough to put the "theory" of evolution to rest forever.

Think about it... Evolution says that new forms of life never appear suddenly. They tell us new species evolve slowly over "millions of years." They claim that small mutations occur to a single species and that over time, a new creature is born.

If that's true, then how can thousands of new creatures come to life all at once – like they did during this one period of history?

Sounds crazy, doesn't it?

Their own scientific discoveries do a nice job of disproving evolution. Yet these very same scientists go on TV and tell us that evolution is "tested and proven."

It only goes to show: Scientists will believe ANYTHING if the alternative is admitting that God created the world!

When you take God out of His own Creation, crazy things start to happen... You get "respected" scientists saying that fish can sprout legs and monkeys can turn into men.

But when you look under the hood, there's NO PROOF whatsoever.

The Trilobite: This complex creature suddenly appeared with no ancestors to evolve from...

Evolution May be the Greatest Hoax in Human History

Let me tell you... All of this really got me worked up. These people are deceiving us at God's expense. Even worse, they're teaching this stuff to our children. Millions of kids are growing up thinking we live in a godless, mechanical world that has no meaning at all.

In spite of many brave parents, schools around the country keep evolution firmly in place – making it the only explanation our kids get. And I don't have to tell you how difficult that makes it to raise kids with real Christian values.

Left unchecked, evolution will eventually rob you of prayer and your personal relationship with God.

Think about this for a moment: Taking God out of His creation means prayer and communication with God becomes a fairy tale – an impossibility.

Darwin believed prayer and the belief in God comes from an animal's instinct to feel awe or inspiration from things it doesn't understand. Scientists now call this "magical thinking."

Here's an example: If a monkey sees a leaf blowing in the wind, it may think the leaf has magical powers because it doesn't know the wind is giving it lift and motion.

Scientists and atheists believe prayer and your faith in God is just a logical next step in the evolution of the "magical thinking" they find in apes and monkeys.

They're taking us for fools.

And for the most part, we're not doing anything about it. But if you learn a thing or two about their "theory," you can win every debate, every time.

Remember Tom... the guy at the restaurant who embarrassed me in front of my friends? I saw him again, two years later. Only this time things were different.

After all my research, he didn't stand a chance. He folded like a house of cards.

In just a second, I'll tell you the rest of the story... First, I want to tell you how I sent him packing.

Here's the key: The average person on the street accepts evolution without understanding it.

They can tell you that it's "proven"... and that's about it. If they've done their homework, maybe they can tell you that so-and-so did an experiment... or so-and-so wrote a book...

But if you know the missing pieces, you can shoot down every one of their arguments – every time. And because they don't really understand what they're defending, they suddenly fall silent when they can't fire off a come back.

They get shell-shocked when they come up against a Christian who knows more about evolution than they do.

In an ideal world, you should be able to defend God's Creation with the Bible alone. But we live in dark times.

Scientists, atheists and all those university types will ALWAYS reject the Bible. It doesn't matter how many passages you quote – they'll ALWAYS tell you that God is a fantasy.

But if you go after their beloved "theory" of evolution – and show them beyond a shadow of a doubt that it's based on a bunch of guesswork, forgeries and outright lies, then congratulations...

You just beat them at their own game.

It's a great feeling. To see them with their mouths hanging open... A look of shock on their faces... Not knowing what to say... Feeling confused and embarrassed...

And here's the best part:

Defeating Evolution Couldn't Be Easier...

After my research I started telling my friends about what I'd found. Like me, they were amazed evolution could be crushed so quickly and easily.

They started to tell their friends and the whole thing started to snow ball. In no time at all, our Sunday morning coffee sessions turned into a small community of Christians devoted to exposing the myths of evolution.

After a few months, I started getting phone calls from people I didn't even know – asking me to tell them about the discoveries I made.

With that in mind, I sat down at the computer and started to type.

I sent out a few drafts by e-mail and the feedback was immediate: These missing pieces were so hot; they were sparking debate and knocking skeptics on their heels.

Now YOU Can Expose Evolution...

With the Same Amazing Results!

I put all the missing pieces into Disprove Darwin In 5 Minutes or Less... In it, I give you simple and effective ways to knock down and tear apart the theory of evolution.

But don't worry: It's not a boring textbook. It's easy to read and everything is set up in a way that's easy to remember and easy to refer back to...

I stripped down and demystified evolution so anyone can understand it. I took out all the jargon and all the non-sense and cut right to the chase.

It's kind of like a handbook that tells you how to counter every argument or piece of "proof" they can throw at you. Within it minutes of opening it you can start using this high-powered ammunition to blow apart any argument, any time...

Even better, I show you how to fight evolution. I don't just give you facts and stories; I give you the strategies the scientists are using to fight against us – and how to counter them.

Knowing How to Fight is the Key to Winning

Once you know what they're up to, you can pull the rug right out from under them – no matter what they throw at you.

I reveal the myths, falsehoods – and in some cases – the outright lies that have propped up the "theory" of evolution for nearly 150 years.

You'll get the simple and easy-to-apply strategies that kick the skeptics to the curb. I'll even show you my "rapid fire" take down that puts every ivy-league evolution lover up against the wall in 5 minutes or less.

Here's just a quick feel for what you'll get a hold of:

- Why evolution is really just a cult based on false assumptions – NOT FACTS.
- The truth behind the missing fossils and the physical evidence that clearly disproves evolution.
- How Stalin, Marx and Hitler used evolution to justify their brutality and drive for world domination.
- The critical discovery Darwin predicted future scientists would have to make to prove evolution. (HINT: It didn't happen!)
- How scientists shamelessly cover up Darwin's failures to prop up his un-provable theory.
- The museum in San Francisco that fabricated evidence to support evolution. (This is happening all over the country!)
- How school textbooks get away with using known fakes and forgeries to teach the lie of evolution.
- Discover the time period in our past that produced thousands of new life forms all at once – with no "evolutionary ancestors" before them.
- Meet the courageous microbiologist who exposed the fraud behind evolution – only to get sacked by the media.
- Evolution has been observed while it's happening, right? Wrong! Hear the stunning admission from one of science's most vocal evolution supporters.
- How evolution poisons your mind – and your soul – by promoting chaos, depression and violence.
- Learn the real story behind the dinosaurs and why these giant creatures crush the theory of evolution.
- MORE MISSING LINKS: Why there's almost no research by evolutionists to explain evolution on a molecular and biochemical level.
- How science has rearranged the evolution argument to make it sound like a lack of evidence is the evidence.
- PLUS: Why scientists have to throw out their beloved "scientific method" in order to embrace evolution – and why they're fighting like mad to keep you from finding out...

Play Your Part in Defending God's Role as Our Creator

When you're armed with the documented, undeniable evidence you'll find in Disprove Darwin In 5 Minutes or Less... you'll have everything you need to take on evolution and win. So don't be surprised when your friends ask you for the details.

Just days after getting it, people will start coming to you for answers. I should know: It happened to me.

I believe it's our duty as Christians to defend our Faith. And honoring God as our Father and Creator is at the core of everything we believe. Without it, everything else falters: Prayer... Devotion... Salvation...

Take away God as our Creator and it all vanishes.

By arming yourself with the truth about evolution, you'll expose the lies and set people straight.

That's Exactly what Happened to Tom...

Six months after finishing my research, I saw Tom in the parking lot of our local grocery store. He recognized me right away. I approached him and asked him if he remembered our lively debate. He cracked a smile so I told him I'd been doing some reading on evolution.

He raised an eyebrow and gave me a smirk, like, "Oh, please... this nutty Bible-thumper thinks he knows something about evolution..."

That's when something remarkable happened. In less than 5 minutes I cut down every "solid" argument for evolution he had ever heard of... And here's the best part:

He just stood there with his mouth hanging open.

He didn't know what to say or what to do... To this day, I don't know what shocked him more: Watching his cherished beliefs go down in flames or realizing I knew what I was talking about.

Help Me Spread the Word!

When I fully understood the impact of this evidence, I knew I had to tell other Christians. That's why I'm writing to you. I want you to know the truth about evolution TODAY!

But I have more for you...

Science and big government are responsible for more than just the tragedy of evolution. For decades they've been taking away your right to get access to (or even know about) the natural alternatives to expensive prescription drugs.

These are the God-given remedies that solve problems without side effects and without prescriptions!

As a health writer, I've uncovered details about the most critical health concerns that threaten you and your family. They're easy to read and packed with practical advice.

These health revelations are drawn from peer-reviewed, clinical studies published in today's leading medical journals.

There's just one problem: If you rely on the medical machine, you'll NEVER hear about them. After all, the FDA wants you on expensive drugs, not safe and affordable alternatives. By protecting the giant drug cartels, they're taking away your freedom of choice. But there's a way around all that...

Today these Special Reports are Yours FREE!

Here's a quick look:

FREE SPECIAL REPORT #1: Would You Knowingly Give Your Child Cocaine?

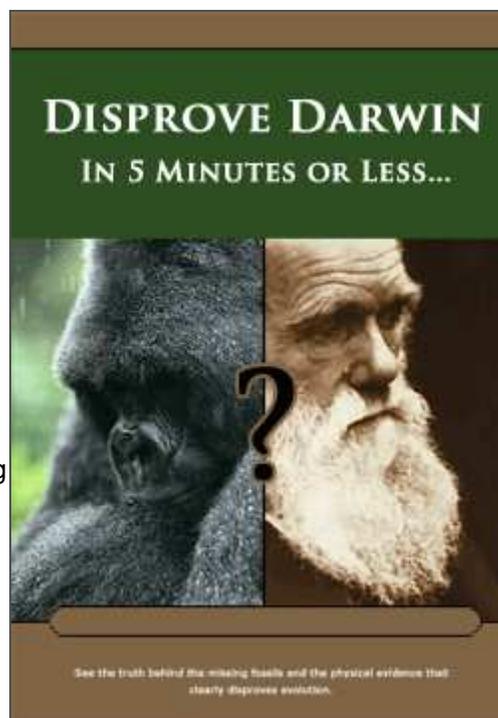

Beat Attention Deficit/Hyperactivity Disorder (ADHD) Without Doctors, Drugs or Prescriptions...

ADHD didn't exist fifty years ago... Yet today doctors are slapping this label on kids (and adults) at alarming rates. It causes distressing and debilitating symptoms, as well as considerable functional impairments.

Prescribed like candy to millions of children Ritalin, Adderall and other potent drugs come with serious side effects.

These drugs are powerful and habit-forming. Ritalin and Adderall both have amphetamine-like effects that in many cases are more powerful than cocaine.

Clinical studies reveal safe, natural and inexpensive remedies for ADHD. But don't expect to hear about them on TV or in the newspapers... Drugs for ADHD are BIG business and generate billions in revenue.

This special report breaks from conventional medicine to offer a natural solution for you and your family. In just a few easy steps, you can eliminate negative symptoms, such as restlessness and increase your concentration skills. Nutrition can effectively work as an alternative solution for ADD. All the details are backed up with easy-to-follow advice and references for further reading.

FREE SPECIAL REPORT #2: See Sharper Lines and Brighter Colors...

Prevent Vision Loss and Enjoy Crisp, Clear Eyesight as You Age

Here's something your eye doctor may never tell you... Good nutrition leads to sharp, clear vision. Did you realize your eyes need a specific list of "eye foods" that keeps your vision in peak condition?

Most people – and you may be one of them – don't get even a fraction of these critical nutrients. And your eyes need a fresh supply everyday. But the answer is simple. These nutrients are available at your local grocery store and won't cost you an arm and a leg.

- Get the names and exact doses of the nutrients that power up the part of your eye responsible for seeing vivid colors and sharp lines!
- Discover the 2 different kinds of age-related macular degeneration and how to protect yourself against both.
- Learn the real connection between nutrition and eye health and why taking vitamin A on its own won't help you.
- Find out which foods provide the best natural protection against vision loss.

(Retail value: \$9.95)

FREE SPECIAL REPORT #3: Boost Your Brainpower in 3 Simple Steps

There are 5 simple nutrients that can protect your memory, burn through "brain fog" and help you think more clearly. They're all safe and have decades of research behind them. This report will tell you what they are and how much to take of each one.

Plus, you'll get dozens of strategies that can sharpen your thinking and prevent you from losing your memory and power of concentration as you age. You'll discover the #1 thing you can do RIGHT NOW to preserve and promote your mental clarity.

You'll also learn:

- How to beat the brain-destroying effects of cortisol (your stress hormone).
- Tools you can use to reverse cognitive decline.
- The best way to protect yourself from dreaded Alzheimer's Disease.
